HOW HIGH CAN YOU FLY WHEN ECONOMIC COLLAPSE OCCURS YOY DURING START UP CYCLE

CORPORATE TSUNAMI

TABLE OF CONTENTS

Blood In The Water

Blood is in the water and the tides are raising, ready to engulf those who are vulnerable and exposed to the conditions it presents itself.
A predictor to nothing but a hope that financial decisions made totally correct; those mistakes done yesterday.
An already undone situation cannot be undone but to embrace new decisions for a hopeful tomorrow.
An induction that all is set and in your favor are when the signals hit red. A motion that to stop is financial suicide and to not run through it signifies the risk you are willing to take in reassuring your financial decision.
It does affect the corporate structure and the sentimental feelings of those who have spent some time allowing the system to function healthy enough to reap substantial earnings.

A Village Economy

But as everything which is healthy it can become ill due to a lot of environment condition uncertain to your causes.

While the symptoms are generic in nature for the early adoption of techniques and poised affirmations to be released once seen, is not enough to defend against huge tidal wave not only affecting your corporate place in the economy but a lot.

The sweeping tidal waves engulf all types, forms, structures and final position all over. A takeover catastrophic in nature disturbing the peaceful village economy, thus eliminating only signs of rejuvenation.

Impossibility, irresponsibility and frivolity are the order of the day, to believe that an economy can be untouched by the worldly events because your economy has no nexus connectivity to the outside economy.

A village economy of makeshift shops, products, customer loyalty and purchasing power is not the type of essentials needed in today globalized shelf life.

The new millennia is poised to affect all and sundries within it. No matter your economic position and corporate stance to distance your product and customer away from the shark.

Financial Structure

Developing independent financial institutions and envelope lending strategies to concerned loyal businesses to keep good their credit by localizing their downstream economy to spread this amongst their territory, is a past mistake some seem to not defer from its continuation.

In fear of being exploited and cruxes into spending huge fees and trading tariffs just to diversify their products reach, making less profit entirely in the value chain supply of transactional logistics.

However it is written and framed, untouched from realities of globalized condensation. The magnificent tremor of relaxation is that tsunamis occur after a huge shaking up of the norms of doing business.

Shock In Approach

A shock which is catastrophic in nature, affecting the target it is intended to harm, seemingly then rushes downwards to other territorial regions, which is another method of elimination.

A reference of a natural disaster in context to brightening a picture of uncertainty, is not afforded any luxury to support corporate tsunamis due to opportunities of rebuilding product stream dissimilar to the former, is a reality some take charge of.

Businesses are bleeding along with the economy it creates and state which were dependent solely on its monolithic structure.
