Master your own Destiny!

The master to your own destiny; a presumed assumption placed onto yourself by others inclined to see you become the evolved self.

Transform to do one thing and one thing only; to dominate your industry.

Peel out all diseased shell covering its normal existence and squeeze out its essence of purity.

Drink its pure form in alignment to your own personality goals.

Exchange of Goods

The beast mode, to erupt your present condition and to force your well being into something special, something penetrative.

For it is your best desire to not take life for granted and to develop the necessary skills to take your appointed self into new territories.

While the dreaming is an affirmation the doing is your confirmation.

For the reality remains the door knock of perception as it's the only thing one can measure to at least see if you possess the will they require to spend money on.

Money is spent to receive a reward, transferable the means to produce a good or service, denominated as financial.

Remember to place a financial reward to all transferable services but it is a face value on how much you can achieve within a specified time.

For the only way to achieve maximum reward is through excessive practice to dominate your skills to a point of enduring the maximum force, for time keepers themselves would not be able to compile if work are incomplete or not.

For their measuring systems deduce your potential to over maximize their own productive system.

Business Empires Strike Back

When these sightings are seen, you have guaranteed your place to be the monster within your industry.

Only designing to conquer more space once allowed.

These spaces become a territorial market space to venture, to build your own industry and to be the money mobster digging other people's money well.

Beast mode triumph over the will of others and surely it creates displacement amongst the workforce.

But what do you rather; to be the normal incompetent being that dreams big but fails to test all possibilities, to become a new reality or be the dreamer, implementer, conqueror and then a legend.

This is what business empires are, to give the dreamer an opportunity to be a beast within and a money mobster outerin.

Economy of Exchange

For property biases and sentimental values are what you need to enter the next phase of industrialization complexities. Its worth something to give something in exchange for that's how the economy functions.

The aim here is to build enough capital through venture initiatives that your excess reserve of profits surmounts an entire GDP of a nation, so diverse outcomes can be fruitful to your investment portfolio.

But these out product realities cannot be met if the determination of self never resurrects the passive possession of letting hold of the inner beast to conquer your domain.

Quite simple indeed but most difficult to attain for the will is what fuel the desire to breed the monster to acquire enough wealth to hold power of spend.

Because in the world of creativity and originality it is difficult to survive without the will to be the mutated species different from your industry peers.
